Improper Image Formation

Improved Image

#### Possible Causes of Improper Image Formation

1. Defocused camera lens.
2. Sensor noise during image acquisition.
3. Poor lighting causing low contrast.
4. Motion blur due to camera movement.
5. Optical lens imperfections.

#### Suggested Improvements

1. Use proper camera focus.
2. Reduce sensor noise using denoising filters.
3. Improve lighting conditions.
4. Apply image sharpening.
5. Enhance contrast using CLAHE.
